Dear Hons.Dalli & Hons.Bartolo;

Whilst we hope that this E-mail finds you well.

We came across an article stating that the organic waste will be collected between 1am and 5am.

With all due respect, we would like to know who is coming up with these ideas? Maybe they live in the countryside where there are no catering establishments? Can you imagine the situation in Valletta with the waste collection trucks vibrating through our narrow streets? Can you imagine the rats and cockroaches feasting on the organic rubbish throughout the night? The smell? And more sleepless nights for us poor residents? Please, be practical and collect the organic waste from the catering establishments at the same times and days as that of us residents.

The residents must never be victimised because of the business people! Residents do not have to cater for the businesses, it's actually the other way around.

We residents have already went through things like this in the past, it created several issues, as mentioned above and now someone wants to put us through it all over again?

We object to this idea.

Kindest regards,

ResidentiBeltin
